General Information

This Nursing Assistant Program Student Handbook is provided to students interested in or who have been admitted to LTC’s nursing assistant program. The intent is to communicate policies and procedures, and prepare students for experiences unique to the nursing assistant program. This handbook supplements the general college handbook. In some cases, policies and procedures are more defined in the nursing assistant program student handbook as we prepare the students for the health care workforce, in response to local employer requests, to meet Wisconsin Department of Health Services requirements, for the purposes of student success, to ensure equitable treatment of students, or a combination of any of these interests.

Faculty may modify policies, given sufficient cause and will announce changes to the class. These policies are intended to be current but are subject to change. The most current edition of the handbook is available on the LTC website: http://gotoltc.edu/pdf/nursingHandbook.pdf

Course Description

The Nursing Assistant program prepares students for employment as nursing assistants. The program also prepares Nursing Assistant students with some of the skills needed for the first semester of the Nursing program. During the 120 hour course, students will be required to demonstrate the following skills under the supervision of a licensed nurse: communication, basic nursing assistant and personal care skills, attention to client’s rights; and care of clients with dementias. The program is recognized by the Wisconsin Department of Health Services as a nurse-aide training program. Upon successful completion of the program, the student is eligible to take the Wisconsin Nursing Assistant competency evaluation for employment in nursing homes, hospitals, home health agencies, hospices, CBRF’s, assisted living centers and homes for the developmentally disabled.

Textbooks

3. LTC Nursing Assistant Student Handbook

Additional Supplies

- Access to computer with internet access is needed for this course
- Clinical uniform, appropriate shoes, and a watch with a second hand.
- Pocket-sized notebook for clinical

LTC Core Abilities for Students

1. Demonstrate Critical Thinking
   a. Learner determines issues that merit action
   b. Learner takes initiative in the problem solving processes
   c. Learner makes decisions considering alternatives and consequences
   d. Learner refines action plans based on evaluation of feedback

2. Demonstrate Responsible Work Ethic
   a. Learner displays behavior consistent with the ethical standards within a discipline or profession
   b. Learner follows policies and procedures
   c. Learner attends class as mandated by the instructor
Nursing Assistant Program Outcomes

1. Communicate and interact effectively with clients, family, and co-workers
2. Maintain and protect client rights
3. Report information and record observations
4. Demonstrate the ethical and legal responsibilities of the NA/HHA
5. Provide safe care to a diverse population, meeting personal, physical and psychosocial client needs
6. Assist with client rehabilitation and restorative care, promoting independence
7. Assist clients with long-term, disabling condition including dementia, always focusing on the strengths of the client
8. Work cooperatively in a team environment
9. Eligible to take the WI NA competency evaluation
Nursing Assistant Program Competencies

After completion of the training program, a nurse aide shall do all of the following:

1. Function within the ethical and legal responsibilities of the Nursing Assistant/Home Health Aide
2. Interact with clients, families and co-workers
3. Display appropriate nonverbal skills in the work setting
4. Establish a therapeutic relationship with clients, families and co-workers
5. Respond to clients that exhibit problematic behavior
6. Respond to aggressive behavior
7. Establish working relationship with supervisors and peers
8. Carry out assignments
9. Report information
10. Record observations
11. Develop job seeking and keeping skills
12. Protect rights of client
13. Adhere to laws and regulations governing nursing assistants
14. Uphold the legal responsibilities of the nursing assistant
15. Apply principles of medical asepsis for client and personal safety
16. Apply infection control measures
17. Apply measures for the prevention of blood borne infections
18. Maintain a safe environment
19. Perform airway clearance maneuver
20. Apply body mechanics
21. Make an occupied and unoccupied bed
22. Carry out the basic nursing skills required for the nursing assistant
23. Examine types and uses of restraining devices
24. Use restraining alternatives
25. Demonstrate sensitivity to emotional needs, social diversity, and mental health of clients and coworkers
26. Treat client respectfully regardless of social, ethnic, or religious background
27. Assist client to meet spiritual needs
28. Adapt care to meet the physical needs of the aging client
29. Adapt care to meet the psychological needs of the aging client
30. Apply strategies to cope with client and family stress
31. Apply strategies to cope with caregiver stress
32. Provide for personal skin care
33. Assist with bathing
34. Give complete bed bath
35. Provide for personal care and hygiene
36. Assist with personal grooming
37. Apply heat and cold applications
38. Apply non-prescription (OTC) medications
39. Assist with nutrition and fluid needs
40. Assist client with eating meals
41. Assist with eating difficulties
42. Measure intake and output
43. Assist client with bladder elimination
44. Maintain urinary catheter
45. Assist client with bowel elimination
46. Assist client with bowel and bladder retraining
47. Measure a temperature
48. Measure pulse, respiration, weight and height
49. Recognize normal and abnormal blood pressure readings
50. Care for client's with alterations in vital functions
51. Provide client comfort measures
52. Assist with the care of dying client
53. Assist with moving or positioning a client in bed
54. Promote joint mobility, body alignment, and activity
55. Assist with ambulation
56. Use client transfer techniques
57. Assist client with range of motion exercises
58. Apply prosthetic and orthotic devices
59. Promote client independence during activities of daily living (ADL)
60. Assist clients with hearing or vision impairment with activities of daily living
61. Assist clients with speech impairment with activities of daily living
62. Care for client with developmental disabilities
63. Care for clients with long-term, disabling conditions including dementia
64. Assist clients with dementia through environment and activities
65. Manage stressful situations with clients with dementia
66. Provide food and fluid intake monitoring and interventions for clients with dementia
67. Manage behavioral challenges of clients with dementia
68. Recognize the general effects of prescribed routine medications
69. Compare home health care to health care in a facility setting
70. Describe the unique qualities and responsibilities of a home health aide
71. Assist with restorative therapies

**Grading Policy and Rationale**

Students will have a final evaluation based on the components listed below. Students may graduate from the program when they meet the following conditions:

- Obtains a comprehensive overall percentage for the course of 78%.
- Completes all assignments according to the due dates
- Obtained 120 hours of instruction
- Abides by the attendance policy; has not been absent more than once (which must be made up)

**Learning Plan & Final Exams**

- Obtains an average of 78% or higher on the learning plan exams.
- Obtains a score of 78% or higher on the final exam.

**Pre-lecture practice quizzes**

- Completes all pre-lecture quizzes as assigned.

**Skills**

- Satisfactorily demonstrates safe clinical skills in lab and/or clinical; unable to do so will result in immediate failure of the course.
- Demonstrate a 78% or higher for core ability skills; all core abilities must be rated > “0”

**Components of Student’s Grade Include:**

- Learning Plan Exams – 40%
- Final Exam – 10%
• Pre-lecture practice quizzes – 5% of the final grade
• Clinical Skills – 25% of the final grade
• Core Ability Skills – 20% of the final grade

Assessments
• Learning plan exams are assigned for each reading assignment and are completed through Blackboard. They can be taken on any computer with internet connection without a proctor. They can only be taken one time. It is expected that they will be completed according to the course calendar. It is expected that the overall average of the learning plan exams is 78%. Inability to obtain a 78% combined average for the learning plan exams will result in immediate failure of the course. The student will not be able to proceed to the clinical component of the course.

• A final exam is assigned during the first several days of the clinical component of the course. It is a cumulative multiple choice question test. It can be taken on any computer with internet connection without a proctor. It can only be taken one time. It is expected that it will be completed according to the course calendar. It is expected that the minimum final exam score is 78%. Inability to obtain a 78% combined average for the final exam will result in immediate failure of the course. The student will not be able to complete the clinical component of the course.

• Video viewing and related practice quizzes are assigned prior to each class in preparation to practice and demonstrate skills in the lab setting. The practice quizzes are completed through Blackboard. They can be taken on any computer with internet connection without a proctor. They can be taken multiple times to help you learn the related skill content. The highest score will be used.

• Clinical Skills will be practiced with demonstration of competency in the lab setting prior to performing the skills with residents or patients. Students are expected to be prepared to practice skills by watching videos, completing pre-lecture quizzes and reviewing the assigned reading and Wisconsin Nurse Aide handbook. Students must demonstrate skills competently in the skills lab and the clinical setting in order to pass the course. Competency is demonstrated by completing the skills using the performance criteria in the course text with minimal prompting from the instructor. Each skill will be scored as satisfactory or unsatisfactory. Unsafe performance in skills when caring for residents will result in course failure.

• Core ability skills are college and employer identified skills that prepare students for employment. They will be evaluated throughout the course in the classroom, lab and clinical setting. No single skill may be ranked at “0” for the final grade. If there is a core ability skill that is ranked at “0”, it will result in course failure.

Grading Scale
A = 93 – 100%
B = 86 – 92%
C = 78 – 85%
D = 70 – 77%
F = 69% and below

Course Structure
At least 120 hours of instruction will be provided to each student. Hours of instruction are provided in several formats:
• Clinical Hours = 50
• Laboratory Hours = 30
• Lecture Hours = 40
  o Classroom Lecture: 16 hours
  o Practice Quizzes: 4 hours
  o Learning Plan Exams: 9 hours
  o Final Exam: 2.5 hours
  o Lippincott’s Online Videos: 6.5 Hours
  o Self-Learning Modules: 1 Hour
  o Assigned research assignments: 1 Hour

**Preparing for the Nursing Assistant Course**

You will note that this program is called Nursing Assistant, not “CNA.” Certification comes upon successful completion of our program AND THEN successfully passing the state certification exam. All of the knowledge and skill you develop during this course of study lead up to your certification exam and employability. Every competency that we cover has great importance to the care our community health care facilities provide to their clients, and to your future as a health care professional. We understand that this program is demanding of your time and your focus. However, the rewards are great when you use this program as an opportunity to begin a successful health care career with new skills, knowledge, and professional behaviors.

**Time and Commitment**

The nursing assistant program demands perseverance, stamina, and time devoted to study. Clinicals are generally scheduled during day and evening shifts. In addition, online exams during non-scheduled class hours are required prior to participation in classroom or clinicals. Successful students understand and prepare for intense focus, making attendance, course requirements, and clinical performance a priority.

Due to the strict 120-hour requirement, vacations, school functions (band, honor society, sports, etc.), personal conflicts, work schedules cannot be accommodated. If you have anything that conflicts with your nursing assistant class and clinical schedule, please choose a different section to register for.

We recommend that immediately following your registration into a class, you design a calendar or other method of time management. Create a vision for how you will meet the program requirements and maintain balance in the other areas of your life. Communicate with those you need to so that they can support you in your educational process.

**Outside of Class Work**

This course requires the student to do work in addition to the scheduled class-time. You can expect to spend 2-3 hours per course hour (e.g. 3-hour class may require 6-9 hours outside class work) working on learning activities and assessments. Keep in mind, this time is for one class, and is an average; your individual time may vary. If you are taking more than one class, be sure to allow additional time for them as dictated by the courses.

**Outside Employment Recommendations**

Research demonstrates delayed responses on the part of health care staff experiencing fatigue due to lack of adequate sleep. In the interest of patient safety and optimal learning, we advise that students not work more than 12 hours at a place of employment and your program clinicals (combined) within any
24-hour period. Successful student balance of work, school, family, and self, making sure they maintain adequate time for theory and clinical requirements.

**Student Attendance and Participation**

As the Wisconsin Department of Health Services (DHS 129) requires at minimum 120 hours of learning to complete the program, students are required to attend ALL scheduled classes and clinicals. **If you know you will need to miss one of the scheduled days, please register for a nursing assistant course offered at another time.** Please be aware that attendance and tardiness records are maintained in accordance with DHS 129 regulations as published in the state’s administrative code and may be audited at any time for compliance. Therefore, LTC will comply with all DHS regulations for nurse aide training with 120 hours meeting the minimum.

Our strict adherence to our attendance policies will not only keep us in compliance with the Department of Health Services regulations for Nurse Aide training programs, but will ensure that each LTC student enters the clinical setting with all the information and skills they need to provide the best care for patients and residents in our communities. Our attendance policies are uniformly applied to all students. Satisfactory performance in the clinical setting requires that all of the objectives for the clinical rotation be met. **Absence from the clinical area may result in your inability to meet the clinical objectives necessary to achieve a satisfactory grade.**

Due to the small class size required for nursing assistant instruction, class sessions that are generally 5–8 hours in duration, and the need for students to progress through the curriculum and skill development at the pace the curriculum communicates, absences are not able to be made up. If there are extenuating circumstances, one absence **may** be able to be made up. Examples may include injury, illness that may be communicated to the patients or residents, or an event qualifying for FMLA. However, more than one absence results in a student’s inability to catch up to the rest of the class. Therefore students will fail the course on the second absence. For this reason, absences such as vacations, doctor appointments, work, sport events or other school related functions during the scheduled class time will not be allowed.

**Absence due to Illness or Emergency**

Students are required to discuss with their instructor cases of illness or injury involving themselves and/or family members when they prevent class attendance. The most responsible approach is to initiate discussion well before the date of occurrence.

In the case of an emergency absence, the **STUDENT IS REQUIRED TO NOTIFY THE INSTRUCTOR PRIOR TO THE START OF THE CLASS** or clinical. If you need to miss a clinical and cannot contact the instructor, contact the clinical agency directly, inform them of the situation and ask them to pass on the message to your instructor. For your own protection, make sure you ask the name of the person you leave a message with and note the time that you called them.

All situations involving a students’ inability to complete the 120-hour requirement are reviewed with DHS. The instructor may require a physician’s release prior to returning to the next scheduled clinical experience dependent upon the nature of the illness or injury. DHS maintains final decisions on providing a student with an incomplete for the course and allowing the student to make up the work.

So that interruption of other student’s learning process is avoided, we will adhere to our attendance policy. Depending on the circumstance, a student may or may not be able to make up one missed class.
In some cases, students may be asked to repeat the program. Decisions are based on the reason for the absence, on the content the student missed, and the timing of the absence in the program as it relates to entering clinicals.

**Consequences of Absences**

a. Two absences for any student circumstance will result in immediate dismissal from the program and an F for the final grade.
b. Failure to appear to the first day of class without contacting the instructor before the start of class (No call and no show) will result in immediate dismissal from the program.
c. Failure to appear to any subsequent class without contacting the instructor before the start (No call and no show) will result in immediate dismissal from the program and an F for the final grade.

**Weather Related Absences**

In the event of inclement weather, access your local TV stations, listen to your local radio station, or access LTC’s website (http://gotoltc.edu/current-students) for news of delay or cancellation of LTC classes. If LTC communicates a delay, it is generally a 10:00 a.m. start. Because clinical times vary, your instructor will manage the potential weather related delays in class start time. Your instructor will communicate what will happen should there be a delayed start to a school day due to weather. Report to labs and clinicals at the time communicated. Time missed will need to be made up to reach the 120 hours required.

**Timely Arrival**

You are required to arrive to class and clinical 10 minutes prior to the listed start time, with hands washed and in your seat at the start of the session. In the spirit of quality instruction for classmates, courtesy to the instructor, and emphasizing successful core ability skills, students who are unable to arrive 10 minutes prior to the start of class or clinical MUST CONTACT THE INSTRUCTOR PRIOR TO THE ABSENCE OR TARDINESS. Students who are not ready to work at the time the class or clinical is scheduled are considered tardy.

**Consequences of Tardiness**

a. Students entering the class late but before the 15-minute mark may enter, but will not interrupt the class. That is, students entering late with the instructor’s permission should enter quietly and catch up to the group on their own. These students will need to make up the time they missed at another time convenient for the instructor. If written assignments for making up the 15 minutes are made by the instructor, that work may exceed the 15 minutes if the instructor believes it will strengthen the student’s knowledge and/or skills, or if the student takes longer to do the assignment.

b. Tardiness of 15 minutes (or more) is considered an absence. To allow the instructor to support other students learning without interruption, students entering the classroom or clinical 15 minutes after the start may not be allowed into the class or clinical setting.

c. The third time a student is tardy (any amount of time after the start of class, but less than 15 minutes), the student will fail the course and will be removed from the class and clinical.
ADA Statement

The mission of the Accommodation Services is to be an active partner with students, faculty and staff in creating an accessible learning environment where students with disabilities have an equal opportunity to participate in all aspects of Lakeshore Technical College programs, services, and activities. The American with Disabilities Act (ADA) of 1990 (42 U.S.C & 12101. et seq), the ADA Amendment Act of 2008, and Section 504(e) of the Rehabilitation Act of 1973 (29 U.S.C & 794), prohibits discrimination of persons because of their disability.

Accommodation requests require the approval of Accommodation Services, the nurse aide training program contact, and the DHS Office of Caregiver Quality. All requests for accommodations must be approved before a student has enrolled in the program. The prospective student must provide documented proof of the need for the accommodation. Any accommodation cannot substantially alter the requirements or nature of the program or inflict an undue burden on the program and/or clinical sites.

A student requesting reasonable accommodation is required to:

- Submit an Accommodation Request Form to Accommodation Services, requesting accommodations.
- Submit documentation of the stated disability. This documentation must identify the disability for which accommodation is requested, and substantiate that the need for accommodation is related to the disability. In general, documentation should not be more than five (5) years old.

Accommodations are outcome neutral, and are not intended to provide any advantage or guarantee of success in a course or program.

If you have any questions about receiving accommodations, or would like to schedule an appointment, please contact the Accommodation Services Office at 920.693.1222.

Please note that course requirements will not be waived but accommodations may be made to assist you to meet the requirements.

Additionally, this program course adheres to a set of Technical Standards that are necessary to ensure your success in this course and program. A student taking this course as a standalone course and not part of an LTC program still must meet the stated abilities for that program. To view the stated abilities for this program course, please visit the Current Students home page at http://gotoltc.edu/current-students.

Student Rights and Responsibilities

Integrity, both academic and professional, is viewed as an essential component of the nursing assistant program. It is the expectation of the faculty that students will act in a manner that conforms to the college’s standards as well as the professional standards expected by area employers. Therefore, in addition to LTC policies, students will need to comply with the policies and procedures of the Nursing Assistant Student Handbook and to the policies and procedures of their clinical sites. Students are expected to be familiar with Lakeshore Technical College policies and procedures. See Student Handbook.
Academic Integrity Code

As an academic community, it is fundamental that every member of the college, including students, be responsible for upholding the highest standards of honesty and integrity. Activities that have the effect or intention of interfering with the institution’s mission, its educational programs, the pursuit of knowledge, or the fair evaluation of a student’s performance are prohibited. Examples of such activities include, but are not limited to, misrepresentation of academic records, cheating, plagiarism, fabrication, multiple submissions, facilitating academic dishonesty, and unfair advantage. Faculty members have the discretion to resolve cases of dishonesty on their own or formally initiate a hearing through the division dean and Student Services Office designee.

Because patients and residents rely on health care professionals to act on their behalf, a student who demonstrates academic dishonesty in a class, lab, or clinical may be advised to consider non-health care careers. Such events prevent the student from gaining the knowledge or skills necessary to care for patients. Further, it compromises the trust a patient, colleague, or manager has in a nursing assistant. Most importantly, the lack of knowledge or skill as the result of the practice of dishonesty in your profession is a threat to patient safety. Therefore, academic dishonesty of any kind in a classroom, lab or clinical setting, will result in disciplinary action. Consequences for violation of these guidelines may include, but are not limited to reprimand, loss of credit or failing for specific assignments, or dismissal from the program. The instructor and dean will determine the disciplinary action based on the event and disciplinary action taken on previous occurrences. These decisions are final.

Student Conduct Code

Lakeshore Technical College is an academic community that maintains high standards of instruction and provides a safe campus for all persons utilizing its programs and services. As a learning organization, LTC monitors student conduct, encourages positive behaviors and requires academic integrity in support of a positive teaching and learning environment.

The College will take action to prevent and stop any behavior that inhibits learning as a result of:

- Not complying with all LTC policies including program handbooks.
- Not complying with municipal, state and federal laws.
- Interfering with the educational process in any manner.
- Conduct that endangers the safety and well-being of self or others.
- Engaging in violent or threatening behavior toward any student or employee of the College at any time and at any location.
- Conduct which disrupts the operations of the college and/or classroom.
- Unethical, inappropriate, or illegal use of electronic communication.
- Using, possessing, or distributing drugs, alcohol, explosives, dangerous chemicals and/or other weapons.
- Engaging in violent or threatening behavior such as, but not limited to, sexual assault, sexual harassment, domestic violence, dating violence and stalking.
- Academic dishonesty.
- **Misrepresentation of academic records**: Misrepresenting or tampering with or attempting to tamper with any portion of a student’s transcripts or academic record, either before or after
coming to Lakeshore Technical College (e.g., forging a change of grade slip, tampering with computer records or falsifying academic information on one’s resume).

- **Cheating**: Using or attempting to use unauthorized assistance, material, or study aids in examinations or other academic work or preventing or attempting to prevent another from using authorized assistance, material, or study aids (e.g., using a cheat sheet on a quiz or exam or altering a graded exam and resubmitting it for a better grade).
- **Plagiarism**: Using the ideas, data, or language of another without specific or proper acknowledgement (e.g., copying another person’s paper, article, or computer work and submitting it for an assignment; cloning someone else’s ideas without attribution or failing to use quotation marks where appropriate).
- **Fabrication**: Deliberately falsifying or inventing any information or citation in any academic work (e.g., making up data for an experiment, falsifying data, citing nonexistent articles, or contriving sources).
- **Multiple submissions**: Submitting, without prior permission, any work submitted to fulfill another academic requirement.
- **Facilitating academic dishonesty**: Knowingly helping or attempting to help another violate any provision of this code (e.g., working together on a take-home exam).
- **Unfair advantage**: Attempting to gain unauthorized advantage over fellow students in an academic exercise (e.g., gaining or providing unauthorized access to examination materials; obstructing or interfering with another student’s efforts in an academic exercise; lying about a need for an extension for an exam or paper; continuing to write, even when time is up, during an exam; or destroying or keeping library materials for one’s own use).
- Theft of or damage to College property or personal property.
- Failing to comply with a reasonable request or directive from an employee of the College.
- Additional provisions from accrediting bodies may supplement this Student Conduct Code.
- Creating false accusations towards other students or staff.
- Lewd and lascivious behavior.
- Not complying with program accreditation requirements.

**Sanctions for violations could include, but are not limited to:**

- Loss of credit for a specific assignment
- Failing grade
- Written letter of reprimand
- Probation
- Suspension from class/classes (length to be determined by infraction)
- Suspension or removal from the program (length to be determined by infraction)
- Expulsion from the College

In addition to the formal disciplinary sanctions described above, the Division Dean/Manager, Enrollment Services Manager, or designee, may determine to impose one or more of the following:

- A letter of apology from the student to any relevant party, including the College
- A meeting with a college official to discuss the student’s behavior and potential corrective strategies
- Fines and/or restitution, where appropriate, when damage has been done to college facilities and/or the property of others

The College’s final decision may be appealed to the WTCS.
Preparing for Class, Lab, and Clinical

You can expect to complete work prior to each lab or clinical. At a minimum, textbooks will be read to a level of comprehension and retention and workbook and study guide assignments will be completed. Videos will be viewed as scheduled. CD exercises may be assigned. Additional pre-session assignments or exercises will be required. Work completed by students prior to class is essential for the progression of the class and for the success of the student. Maximum time for developing skills for safe practice prior to working with clients is our goal. With this in mind, you will not be admitted to the class session if you arrive to class without your pre-assignments completed. Your instructor may wish you to strengthen your knowledge base or skill level and assign you to research a topic new or previously covered in earlier class sessions to better prepare you for patient/resident care. These are also required at the time assigned. Omission may result in changes in client assignment or non-participation in clinical practice.

Use of Handheld Technology and Social Media
To maintain an effective learning environment you are required to silence all electronic equipment such as cell phones or tablets during class, lab and clinical. The use of electronic devices will not be allowed during any class, lab or clinical session unless specifically directed by the instructor. Texting, checking e-mails or accessing the internet during any class, lab or clinical time is not allowed. Any violations of handheld technology will have the consequence of automatic dismissal from the program. In addition, students are responsible to maintain client confidentiality. Posting patient/resident information or pictures on social media such as Facebook, Twitter, YouTube is a violation of confidentiality and would be cause for removal from the clinical setting and dismissal from the program.

Clinical Skill Development
The instructor uses evaluation criteria that have been established to validate student’s ability to perform nursing assistant skills. Prior to the performance of a skill with a client in the clinical area, a student must satisfactorily demonstrate the knowledge and ability to perform the skill in the lab. It is essential that laboratory requirements be completed within the time frame prescribed by individual instructors to maintain eligibility for continued clinical attendance.

Students are expected to graduate with knowledge and skills sufficient enough to provide patient and resident care independently and without prompting by a colleague. With the safety and comfort of patients and residents in mind, any student who demonstrates unsafe skills performance in the clinical area may be required to withdraw from or may be terminated or may fail the program. The evaluation criteria are used for all nursing assistant students. Students not able to satisfactorily demonstrate a clinical skill in lab and/or clinical, will not be able to pass the course.

NOTE: Your instructor will describe the management of using mechanical lifts in the lab and/or clinical area. Under no circumstances are you to use mechanical lifts without the presence of your instructor, qualified staff of the facility, or both. Strictly follow the directions provided to you by your instructor. You must be 18 years of age or older to operate or assist a mechanical lift in the clinical setting.

Clinical Practice
Safe practice is defined as:
- Functioning within the boundaries of the nursing assistant role
• Following ethical, legal, and patient care standards
• Demonstrate accountability for own performance including, but not limited to continuity in preparation, documentation, and care of clients; verbal and written communication; and practicing within the scope of preparation
• Demonstration of respect for individuals, to include clients and their families, health team members, and faculty
• Asking for help or guidance appropriately and before endangering a client or colleague in any way
• Performing clinical skills in the clinical environment under the direct supervision of the primary instructor until the time the instructor communicates you are able to perform them independently.
• Competence with all equipment prior to use on a client
• Correcting errors when coached
• Following the directions of the clinical instructor

Students may be discharged from the course if their performance or behavior places the student, resident or patient, classmate, staff or faculty in an unsafe situation. Unsafe practice is defined as:
• Not adequately preparing for patient or resident care
• Attending labs or clinical under the influence of alcohol or drugs
• Behaving in a way that jeopardizes the personal safety of anyone
• Refusal to follow common patient care oral or written orders including care plans given as part of routine care
• Talking in such a way that is unethical or abusive such as but not limited to: revealing confidential information inappropriately, being rude or using offensive language, or demonstrating abusive behavior
• Taking indecent liberties that could be construed as sexual harassment toward residents, staff, instructors, or classmates
• Disregard for safety rules such as smoking or handling materials or equipment in a way that can injure another
• Disregarding Lakeshore Technical College or clinical facility safety rules, or other policies or procedures
• Inappropriate attire
• Repeating errors
• Lying about or falsification of clinical data
• Acts of omission
• Failing to follow the direction of the clinical instructor

**Clinical Dress Code: General Requirements**

If a student’s appearance does not meet the requirements of the dress code or is judged as inappropriate by the instructor, the student will not be allowed entrance into the clinical area for that day and will not be allowed to make up the clinical.

• A professional appearance is mandatory and includes personal grooming, clean shoes, and clean, wrinkle-free uniforms. UNIFORMS ARE TO BE FRESHLY LAUNDERED EACH DAY YOU ARE IN A CLINICAL SETTING. If you have consecutive clinical days, you are required to wash your uniform prior to wearing it on the second day.
• Any style of clean, black or white leather or leather type shoes may be worn. Canvas or cloth shoes are not allowed. Platform, open toe, open heel or clog-style shoes are not allowed.
• Student clinical badges are part of the uniform and must be worn when the student is in the clinical area. They must be clearly visible, located below either shoulder. Clinical badges are obtained through Student Services.
  o Students will be charged for replacement clinical badges if lost.
• A wristwatch with a second hand is a part of the uniform. No fit bits, smart watches, or anything similar will be allowed in clinical.
• Nails will be clean and will not exceed the length of the fingertips. **No artificial fingernails are allowed.** Clear nail polish will be allowed providing that it is well cared for.
• Tattoos that are visible and not covered by the uniform must not be offensive or contradictory to the college’s or clinical agency’s mission.
• Only the following jewelry may be worn:
  o Pierced earrings will be small, unobtrusive posts—not multiple-pierced earrings, no dangling jewelry. No nose rings or eyebrow rings, or tongue studs, etc., will be allowed.
  o Plain rings may be worn. A plain wedding band rather than jeweled engagement ring is encouraged (but not required) as people often experience engagement rings getting caught on bed or other hardware while working.
  o Ear gauges will need to be cleared through the student’s affiliating clinical facility. If it does not fit with that facilities dress code, it may be cause for denial to practice in the clinical setting.
• Hair longer than the top of the collar must be pulled back and styled to prevent interference with client care. Use no extreme hairstyles or hair ornaments.
• Moderate use of cosmetics will be allowed.
• Perfumes and colognes must be avoided, as well as other strong scents such as smoke.
• No gum chewing on units.

**Uniform Guidelines**
Any colored or white scrub suit or uniform style top and uniform style pants/skirt may be chosen with the following stipulations:

**Female Students**
• Style – scrub suit, dress, or top and skirt may be worn. A uniform jacket may be worn. Capri styled pants or lace will not be permitted
• All uniforms must have pockets
• Scrubs or tops will not have words printed on them – characters are permissible
• Skirt or dress length – minimum length of all skirts and dresses is below the knee
• Pant length will be at the top of the shoe. Pants will not touch the floor.
• Waist bands will hit the waist level at all times
• Sleeve length – all uniform tops and dresses must have sleeves. The length shall not exceed ¾ length
• Undergarments – a full-length white slip will be worn with dress style uniforms. Avoid colored or patterned undergarments under white uniforms. Undergarment must be clean and fit properly.
• Stockings – stockings are required. Full-length stockings are required for skirt-style uniforms. Stocking color may be shades of beige or white.
• Socks – plain white, beige or black over the ankle socks are to be worn with pantsuit style uniforms
**Male Students**

- **Style** – scrub suit, or top and uniform pants may be worn. A uniform jacket may be worn. The jacket/top may be worn with or without a white shirt. Tee shirts are not acceptable as a top.
- **All uniforms must have pockets**
- **Scrubs or tops will not have words printed on them** – characters are permissible
- **Pant length will be at the top of the shoe. Pants will not touch the floor.**
- **Waist bands will hit the waist level at all times**
- **Undergarments** – avoid colored or patterned undergarments under white uniforms. Undergarment must be clean and fit properly.
- **Socks** – white, beige or black over the ankle socks are to be worn
- **All facial hair must be neatly trimmed or clean-shaven. Beards may need to be covered.**

**Dismissal from the Nursing Assistant Program**

Violation of the Student conduct code, attendance policies, and clinical agency policies will result in dismissal from the program. Neglect, abuse, inappropriate actions towards a client, classmate, instructor, or staff, or disrespectful or inappropriate language towards same will result in immediate dismissal from the program.

- Should a clinical site refuse a student from returning to complete their rotation, this will be grounds for dismissal from the program.
- Students not able to satisfactorily demonstrate a clinical skill in lab and/or clinical, will not be able to pass the course.
- Students who are dismissed from the nursing assistant program for disciplinary reasons including unsafe practice are not eligible for readmission.
- Students who are dismissed from the nursing assistant program for academic reasons may be considered for readmission under certain circumstances.

**Background Information Disclosure**

Beginning October 1, 1998, the 1997 Wisconsin Acts 27 and 281 requires all students completing an educational clinical requirement (any contact with patients or children with the student in a caregiver role) to have a caregiver background check. LTC is required to perform these background checks to ensure that students will be admitted into clinical facilities.

As part of the program application process, each student is required to complete a Background Information Disclosure form, enclose the current processing fee payable to LTC, and return both to LTC’s Admissions Specialist.

It is important that applicants follow the directions closely. All federal, state, local (municipal), tribunal and military pending charges and previous convictions need to be disclosed. The exception is a single traffic ticket for excessive speed, or parking tickets. Local employers hosting LTC’s clinical students base acceptance decisions on the type of infraction. When multiple events have occurred, the types, frequency or other patterns are taken into consideration. **Failure to disclose will result in applications not progressing through the admission process.**

If a record is found, LTC will pursue an investigation in conjunction with area clinical facilities to make a determination on whether the student can be placed in a clinical assignment. It is ultimately the clinical facilities who decide if a previous or pending conviction or convictions are acceptable for students to complete clinical in their facilities working with their patients or residents. In general, decisions are based on hiring standards.
Caregiver background checks need to be repeated every four years. Upon entry to the clinical courses or reentry into clinical courses, the student needs to have sufficient time remaining on the BID check to complete the program. If not, the student needs to repeat the caregiver background check at the time of entry or reentry into clinical courses. Clinical agencies, in order to comply with federal regulations [42 CFR 483.13(c)(iii)], will not permit clinical experiences for students who have had a finding entered into the Wisconsin Nurse Aide Registry of abuse, neglect, mistreatment of residents, or misappropriation of resident's property. To ensure compliance with these regulations and conditions, LTC cannot provide a student with a clinical experience unless they meet the guidelines of the facilities.

**LTC self-disclosure requirements**

Your program acceptance is tentative until confirmation is received by the college from state data bases on your background disclosure information. If you have lived out of state, you may be required to submit a background disclosure for those states as well.

From the time you complete the Background Information Disclosure form until you graduate from or drop the program, you must report any new charges and convictions for felony, misdemeanor, or municipal ordinance violations, with the exception of parking tickets or a single speeding ticket, to the Associate Dean of Nursing. This investigation regarding charges and convictions may result in your suspension from clinical practice, which may delay or prevent your graduation from the program. In addition, your failure to report will result in your removal from the program.

Note: processes used to review background checks with local employers and reviews of undisclosed information are uniformly applied to every applicant.

**Admissions**

See website, college catalog or program information sheets for admission process. Students are admitted to the nursing assistant courses during fall, spring, and summer semesters. Admission occurs when all requirements have been met:

- Application to the college (found on [http://gotoltc.edu](http://gotoltc.edu))
- Application fee
- Health/TB/Tetanus immunizations current with documentation on file
- Background Disclosure* forms are submitted with the appropriate fees AND
  - background is clear of offenses that prevent placement into a clinical site
- Signature Page indicating review of handbook (end of the handbook) submitted to admissions

**Behavioral Intervention Team on Campus**

For student and staff protection and safety, we have a Behavioral Intervention Team on campus. The purpose of the team is to intervene where a student may indicate or shows signs of potentially harming self or others. It is everyone’s responsibility to report incidents to keep all of us safe. The rule of thumb is, “if in doubt, report.” The easiest way to report a concern is to contact the course instructor, but you may also report using a link on the LTC website under Current Students/ General Campus Information/Behavioral Intervention.

- Behavior Intervention site: [http://www.gotoltc.edu/current-students/general-campus-information/behavioral-intervention/index.html](http://www.gotoltc.edu/current-students/general-campus-information/behavioral-intervention/index.html)
• Behavior Intervention referral form:  [https://webapps.mywilm.com/BitReferral/default.asp](https://webapps.mywilm.com/BitReferral/default.asp)

**Concealed Weapons**
No concealed weapons are permitted in any Lakeshore Technical College classroom setting. Any violations shall be subject to disciplinary action. See the Student Handbook – Student Conduct Code or click on the [Students Rights and Responsibilities](#) link.

**Discrimination/Sexual Misconduct**
Lakeshore Technical College prohibits sexual harassment, which includes acts of sexual violence, as well as discrimination/harassment based on age, race, color, religion, disability, gender, marital status, sexual orientation, national origin, ancestry, pregnancy and other legally protected status. Harassment is defined as verbal and/or physical conduct that unreasonably interferes with an individual’s work or academic performance, creates a hostile, intimidating or offensive environment or is the basis for an employment or educational decision. More specifically, sexual harassment is unwelcome sexual advances, requests for sexual favors, or other verbal or physical conduct of a sexual nature.

Not discriminating based on pregnancy, means that LTC will not exclude pregnant students (or students who have been pregnant) from participating in any part of the college’s educational programs. The college will excuse a student’s absences because of pregnancy or childbirth for as long as the student’s doctor deems the absences medically necessary.

For more details please refer to the [Title IX Sexual Misconduct Policies and Resources](#).

**Incident Reports**
“Incidents” include events that negatively impact the health or safety of a client, student, colleague, instructor or health care professional. Examples may include falls, cuts, muscle strain, other injury, client injury or neglect, or any other behavior or event that the clinical facility or instructor deem to be a reportable event.

When an event occurs, students will work with instructors and facility employees when appropriate to complete incident reports immediately. Instructors will submit the reports to the facility upon completion and to LTC within 24 hours. Students are responsible for their own medical expenses while in laboratory or clinical settings.

**Change of Address/Phone Numbers**
To facilitate communication and ensure receipt of grades and important notifications, students should notify instructor and student services immediately upon change of address, name, or phone number.
Technical Skills Attainment (TSA)

As part of your education through the Wisconsin Technical College System, you will participate in a Technical Skills Attainment (TSA). This TSA is an evaluation of your performance at meeting the program outcomes. This assessment will be done through class activities including skills, clinical performance and examinations throughout the program. This TSA process is not part of your academic grade, but used for reporting to the WTCS office how well our students perform at meeting the listed program outcomes. Your program handbook includes a copy of the scoring guide used to assess your performance at achieving these outcomes. If you have any questions on this process, please feel free to contact the Division Dean.

**DHS requires dates & initials for EACH skill that the student demonstrated with competence.**

**SCORING KEY:**
- Date & instructor initials indicate competent performance
  - (Student is prepared and may need minimal cueing with skill)
- U = Unsatisfactory; needs improvement and additional practice
  - (Student may or may not be prepared but needs significant cueing with skill)
- N/A = not available in clinical areas.

• Adapts to changing/emerging technology 0 1 2

Applies Sustainable Practices
• Incorporates sustainable practices (environmental, economic, social, and cultural) during the decision making process 0 1 2

TOTAL CORE ABILITY SCORE
CORE ABILITY PERCENTAGE
No single skill may be ranked at “0” for the final grade. A single skill ranked at a “0” will result in failing the course.

There are 37 competencies with a potential total point value of 74 points. Students must earn a minimum of 57 points = 78% in Core Ability Skills.

KEY: 2 = Above Average; minimal cueing, ready for clinical or Day 1 employment
1 = Competent; some cueing, on track for clinical or Day 1 employment
0 = Needs improvement; needs additional practice and/or significant cueing. Not ready for Day 1 employment.

Final Evaluation
• Final Course Overall Grade: ____________
• Learning Plan Exams: 40% of Final Grade ____________
• Final Exam: 10% of the Final Grade ____________

Each of these grades must be 78% or higher to pass the course.

30-543-1 Nursing Assistant WTCS TSA Scoring Guide

Directions
This Technical Skill Attainment (TSA) scoring guide will be used to document student attainment of technical skills at the end of the Nursing Assistant program. To meet the requirements on the scoring guide, students draw upon the skills and concepts that have been developed throughout the Nursing Assistant course, and are necessary for successful employment in the Nursing Assistant field. Results will be used to inspire continual improvement of teaching and learning across the Wisconsin Technical College System.

This Technical Skills Attainment (TSA) assessment rubric is to be completed for each individual in the Nursing Assistant program course. As this program focuses on a single course of study, the scoring guide will be scored based on the students’ assessed work (performance assessment tasks) completed within the context of the Nursing Assistant course.

Target Program Outcomes
1. Communicate and interact effectively with clients, family, and co-workers
2. Maintain and protect client rights
3. Report information and record observations
4. Demonstrate the ethical and legal responsibilities of the NA/HHA
5. Provide safe care to a diverse population, meeting personal, physical and psychosocial client needs
6. Assist with client rehabilitation and restorative care, promoting independence
7. Assist clients with long-term, disabling conditions including dementia, always focusing on the strengths of the client
8. Work cooperatively in a team environment
9. Eligible to take the WI NA Competency evaluation

Rating Scale

Technical Standards: Nursing Assistant Program

The American with Disabilities Act (ADA) of 1990 (42 U.S.C & 12101. et seq), the ADA Amendment Act of 2008, and Section 504e of the Rehabilitation Act of 1973 (29 U.S.C & 794), prohibits discrimination of persons because of disability. The purpose of this document is to provide information pertaining to the Technical Standards representative of those found in the profession.

Please note that you are provided with the opportunity to individually discuss these technical standards with an Advisor or other college representative. Accommodations are available for students with documented disabilities through the Accommodation Services Office. For more information related to the accommodations process, please visit: http://www.gotoltc.edu/as

In order to determine eligibility and to receive services, students must submit documentation. In general, documentation should be from within five (5) years of the date of request for services or admission to Lakeshore Technical College. An Individual Education Plan (IEP) alone will not necessarily be sufficient documentation for determining eligibility, depending upon the IEP content and identified disability. Documentation must include:

- Diagnosis and resulting limitations as determined by a qualified professional
- Limitations significantly limit at least one major life activity in an educational setting
  - Example: Mobility, vision, hearing, seeing, learning, etc.

A request for accommodation(s) should be made as soon as possible.

Nursing, Practical Nursing, and Nursing Assistant Technical Standards

Students enrolled in the Nursing career path programs (including Nursing Assistant) should be able to meet the established technical standards identified below. These technical standards are reflective of those found in the Nursing profession.

- Ability to move, transport, push or pull clients or equipment up to 250 pounds, potentially with occasional, frequent or constant exertion.

- Ability to conduct one’s self in a professional clinical environment.
  - Example: Awareness, control, and expression of emotion

- Students must have sufficient endurance, strength, mobility, balance, flexibility and coordination to perform client care activities and emergency procedures.

- Students must have sufficient sensory (auditory, visual, smell, tactical) ability.
  - Examples:
    - Ability to complete client assessments
    - Ability to detect environmental necessities

- Depth perception, detect and identify differentiation of color.
Nursing Assistant Program Student Handbook Sign-off

Print Name _______________________________  Student ID Number ________________

This form will be completed twice, once prior to admission into the program and again before the first day of clinical.

I have read and I understand the Nursing Assistant Program Handbook. By signing this form, I agree to uphold the policies of the program. I understand that I may be dismissed from the program if I am in violation of any of the policies.

I have read and I understand the Technical Standards specific to the Nursing Assistant Program provided in this handbook.

I understand that I must disclose all violations to laws including violations at the municipal/local level.

I understand that when signing the Background Disclosure form, local/ordinance violations should be disclosed in addition to all felonies and misdemeanors. Parking tickets or a single speeding ticket do not need to be disclosed.

I do not have a known allergy to latex and/or iodine

-OR-

I do have a known allergy to latex and/or iodine and have or will send documentation from a health care provider as described in this handbook.

Signature: ___________________________________________  Date: ________________
