

Program Number 31-462-2 Technical Diploma • Two Terms

ABOUT THE PROGRAM

Machines are important in our lives—directly or indirectly. Broken or inefficient machines slow the pace of manufacturing and, ultimately, profits. To remain competitive in today's fast-paced industrial/manufacturing environment, equipment needs to be maintained to run at peak performance. If you like to troubleshoot problems, put theory to work hands-on, and have interests in math and mechanical processes, a career in industrial maintenance may be your key to success.

PROGRAM OUTCOMES

- Use hand and power tools correctly and safely.
- Disassemble, repair, and assemble industrial equipment from manufacturer's technical guides, service manuals, prints, and schematics.
- Maintain and repair hydraulic and pneumatic equipment.
- Solve problems related to production, installation, and maintenance of industrial equipment.
- Utilize specialized rigging equipment including cranes, hoists, forklift trucks, slings, and chains.
