

## Connect with LTC Students

Lakeshore Technical College students are excited to connect with area employers and put their skills to work. There are several opportunities throughout the year for employers to meet and share job opportunities directly with students and faculty. Employers can also sponsor an intern and become part of the college's *FutureForce* internship program. Contact LTC's Career Placement Center to connect or participate in one or all of the following opportunities:

Foua Hang, Career Placement Center Manager

**Need to fill a job opening or an internship?** Post it on Wisconsin TechConnect, a free, online service provided to employers to recruit graduates and students from the 16 colleges in the Wisconsin Technical College System. Employers have the ability to post jobs and internships and access student resumes which are matched to the postings. Once the posting is approved, email notifications are sent to students, graduates and faculty to promote the opening quickly and efficiently.

**Sponsor an intern.** Become part of LTC's FutureForce internship program. LTC students are ready to bring their unique skills to your company and can't wait to learn what your industry has to offer. In addition to hands-on technical education, students have gained key life and success skills, ranging from ethics to critical thinking and communication skills, that employers like you expect. We can work with you to develop a new internship or help you connect with LTC programs that match your needs.

Meet students and faculty to share job openings through an **Employer-on-Campus Visit**. Space is made available on campus for employers to be accessible in student common areas including the cafeteria and lounge Monday-Thursday from 11:30a-1p. There may also be an opportunity to stop into a classroom and share the job opening based upon the specific job opening(s) and classroom flexibility.

Participate in the **Lakeshore Community Job Fair** at LTC. In 2013-14, 55+ employers participated and saw over 500 job seekers between the two Fairs.. We're happy to offer a Fair in the fall and one in the spring which run from 10a-2p on the Cleveland campus. Save the dates now:

- Wednesday, October 29, 2014 & April 8, 2015

LTC offers career development **workshops and presentations** for students to enhance their learning experience and network with employers. Reserve your limited spot now to present to students and staff regarding your business products and services and shed light on your hiring practices and needs. Opportunities are also available to employers to serve as **job shadow hosts, company tour sponsors, and mock interviewers**.

**Connect with the LTC Career Placement Center on LinkedIn.** Keep updated on Career Placement Center news and establish connections with LTC students, graduates, and faculty. It's another great way to share your job posting announcements too.
