

STUDENT UPDATE FROM VP OF STUDENT SUCCESS, POLLY ABTS– April 3, 2020

Greetings, LTC Students -

We received grim information over the course of the week - our country now has more than twice as many confirmed COVID-19 cases as China, the White House and CDC forecasted high death tolls nationwide in the coming weeks, and we learned of the first death related to the virus in Sheboygan County. Sadly, things will be getting worse before they get better.

Continue to practice social distancing, wash your hands frequently and thoroughly, avoid touching your face, sneeze or cough into your elbow, and disinfect frequently used items and surfaces. If you feel ill and need to self-quarantine, or if you contract the virus, please take care of yourself and your family, follow all instructions from healthcare officials, and contact the College Nurse, Renee Bruckschen at 920-693-1111 or Renee.Bruckschen@gotoltc.edu. This information is kept confidential, and allows us to make sure everyone is doing OK and getting the help they need.

Here is a little science homework for you; I promise you will not be tested! Watch the video: [How soap absolutely annihilates the coronavirus](#)

Have a good weekend!

Polly Abts
