Follow the prompts from here as you may be redirected to verify through a text or email.

The screenshot shows the 'My Profile' page with the 'Security Settings' tab selected. Under 'Two-Step Verification Enrollment', the 'Primary Method' section asks the user to select how they would like to receive a passcode. The 'Email message to existing or new email address' option is selected. There is a text input field for the 'New email address' and a 'Send Code' button. Below this, the 'Backup Method (optional)' section is visible, with a note that adding a backup method allows a passcode to be sent to an additional mobile number or email address.

Enter the code emailed or text

This screenshot shows the same 'My Profile' page, but now the 'Verify passcode' field contains the number '123456'. The 'Send Code' button is no longer visible, and instead, there are 'Cancel', 'Resend Code', and 'Verify' buttons. A yellow notification banner at the top of the form area states: 'An email with your passcode has been sent, please verify.' The 'Primary Method' section remains selected as 'Email message to existing or new email address'.
